

HELIUM 5G

Helium network partnered with FreedomFi gateways to create the largest 5G Citizen Band Radio Spectrum (CBRS) neutral-host network in the US. Sync hosts receive a Free FreedomFi gateway + installation which provides wireless network coverage for IoT & cellular devices. In return for providing this coverage and passing data through the device, hosts are rewarded (Helium Token) HNT and Mobile Token (HMT).

EASY TO DEPLOY

Compared to other 5G providers, Helium 5G solutions are low-powered (20 watts), safe, and installations are done within a day.

POWER & INTERNET REQUIREMENTS

Power: Standard 120V outlet
Power Consumption:
+ Gateway 12V 20W
+ Indoor Small Cell 12V 15W
+ Outdoor Small Cell 12V 20W
Internet Speed Min: 150+ Mbps
